YOUR HOME CAN BE
BRIGHT AND BRILLIANT

Whether you're building a brand-new home or remodeling a century-old estate, Control4 Smart Lighting supports all construction types with both wired and wireless solutions.

Control4 Smart Lighting also supports homes where KNX is the standard, such as Australia, China, Germany, Singapore, and the United Kingdom.

MORE WAYS TO CONTROL
YOUR WHOLE HOME

With a series of interface options, you can manage your lighting (and many other devices) from a keypad, touchscreen, handheld remote, or an app on your mobile device.

And, without any interaction at all, simply control it all through a voice assistant or enjoy pre-programmed timing and motion sensors to handle it for you.

YOUR HOME
SIMPLIFIED

A Control4 Smart Home connects the technology, audio, lighting, cameras, and other devices in your home into one simple-to-use system that makes your life more convenient and your home safer, more comfortable, and easier for the whole family to enjoy.

SMART LIGHTING
A SMART HOME ESSENTIAL

Control4

WHAT IS SMART LIGHTING?

- Lights that are automatically on when they should be and off when they shouldn't.

- A warm welcome home in the evening so you never have to come home to a dark house again.

- An easy and intuitive way to dim lights or turn on/off individual lighting fixtures or groups of lights simultaneously across multiple rooms or floors.

- A way to set the perfect mood for relaxing or entertaining, or simply highlight specific features within your home.

- Lights that are automated to respond to when you leave, arrive, relax, and entertain.

- The ability to reflect your routines while you're away, deterring potential intruders.

WHAT ELSE CAN IT DO?

When smart lighting is tied to a Control4 Smart Home Operating System (OS), control extends far beyond just the lights. "Scenes" allow you to control many devices simultaneously—like music, video, door locks, garages, and nearly anything else you can imagine.

With one press of a button:

- Dim the lights and start the movie while the projection screen and shades lower and the surround sound powers up.

- Turn off every light and TV in the house as the alarm arms and all doors lock.

- Set the dinner or party night ambiance with preset lighting levels and the perfect playlist.

- Fire up the jacuzzi as the backyard lights illuminate water features and greenery.

- With no touch at all, be welcomed home with exterior and interior lights that lead your way in.

WHAT DOES IT LOOK LIKE?

Flexible button configurations with beautiful colors and finishes are designed to complement the design of your home and engraved LED keycaps provide an instant view of what is active and what is not.

Custom Engraving
Clearly identifies each button so you know what you're controlling before you touch it.

Backlit Buttons
Illuminates engraving for easy viewing. RGB backlighting allows virtually any color to light up each button.

Status LEDs
Provides visual status of scenes or devices. RGB LEDs can be changed to virtually any color.

Home Control
Quickly lock the doors, turn off the lights and TVs, adjust the home temperature, draw the blinds, and more with the push of a button.
